

Project Description

BrightTV (Viewership Analytics)

Project Overview

The BrightTV Customer Value Management (CVM) Dashboard was developed to analyze subscriber viewing behavior and generate actionable insights to support BrightTV's strategic objective of growing its subscription and improving customer engagement. The project focuses on understanding content consumption patterns, audience demographics, and viewer preferences to enable data-driven business decisions.

Business Problem

BrightTV's CEO aims to grow the company's subscription base for this financial year.:

Project Objectives

The key objectives of this project were to:

- Analyze subscriber viewing behaviour,
- Identify content consumption trends, and
- provide actionable insights that support BrightTV's goal of growing its subscription and improving customer engagement.

Tools and Technologies

- Databricks SQL
- Power BI
- Microsoft Excel
- Miro
- Canva
- Data Studio

Dataset Description

The dataset attached contains information on the user profiles and viewer transactions for BrightTV, including:

- Subscriber ID
- Age
- Gender
- Province
- Ethnicity
- TV Channel
- Watch Duration
- Watch Date
- Day of Week
- Month
- Viewing Time

Analytical Approach

The project followed the following analytical process:

1. Data Cleaning
 - Handled missing and uncategorized values.
 - Standardized province, gender, and ethnicity fields.
2. Data Transformation
 - Created calculated fields for age groups, time buckets, and weekday/weekend classifications.
3. Data Analysis
 - Conducted trend analysis to identify viewership patterns
 - Evaluated channel performance and viewer engagement.

4. Dashboard Development

- Designed interactive Power BI, Excel, Data Studio, DataBricks
- Dashboard dashboards to visualize findings.
- Developed executive summary, viewer demographics, and viewer behavior pages.

Key Findings

- Live Events received the most views.
- ICC Cricket World Cup generated the highest watch time.
- Young Adults are the largest audience.
- Gauteng has the highest viewership.
- Viewership increased from January to March.

Recommendations

- Schedule premium content during peak viewing hours.
- Promote Live Events and sports channels.
- Focus marketing on Young Adults.
- Increase advertising in low-performing regions

Dashboard Components

- Cover Page
- Executive Summary
- Viewer Demographics
- Viewer Behaviour Analysis
- Insights and Recommendations

Conclusion

This project demonstrates the use of business intelligence tools and data analytics techniques to transform raw customer data into meaningful business insights. The findings provide BrightTV with actionable recommendations to enhance customer engagement.
